Objective

I am an experienced technologist seeking an opportunity to work in a small company environment using the Ruby on Rails web application framework.

Summary

- 6 years of experience working on large scale corporate application development and support
- 1 year of experience working in Ruby/Rails with a strong desire to continue building skills
- Demonstrated strengths working in and leading teams on technology implementation projects
- Passionate about technology, usability and design

Ruby on Rails Development

yapa.rendale.com

This project, currently under development, uses a restful design and provides photo storage and sharing functionality.

Highlights: RESTful design, Image Uploading/Thumbnails using AttachmentFu, AJAX Album creation, Photo RSS Feeds

notable.rendale.com

Online note taking application that implements a rich AJAX user interface based on Prototype and Scriptaculous.

Highlights:

Drag and Drop Notes, Inline Editing, Textile Markup, File uploads, Tagging/Tag Filtering.

Professional Experience

Towers Perrin

Senior PeopleSoft Technical Consultant

October 2005 to Current

As a senior technical consultant for Towers Perrin, I have led multiple PeopleSoft self service module implementations. On each project I have developed enhancements and bolt on modules to fulfill clients' business requirements and support critical HR processes for thousands of employees. My clients include IMS Health, Winterthur US Holdings, Harris Engineering, and Ameriprise Financial.

Highlights

- Developed an internal staffing application in PeopleTools used for scheduling consultant engagements for a major line of business within Towers Perrin (Change Implementation)
- Developed Custom Leadership Development module for IMS Health using PeopleTools and jQuery.
- Developed AJAX auto save enhancement for PeopleSoft based on jQuery as well as other javascript based usability enhancements
- Led all aspects of an ePerformance implementation at Harris Engineering including business process analysis, technical development, and communication with senior leadership.
- Developed a custom reporting and management dashboard for ePerformance using PeopleTools

- Presented on best practices in PeopleSoft development for user groups, forums and prospective clients

Capital One Financial

Developer | Development Lead

June 2001 to October 2005

While at Capital One I acted as a developer and development lead. I was recognized for my resourcefulness, technical abilities, and dedication to delivering high quality solutions for our customers. I worked in a wide variety of technologies but was primarily focused on PeopleSoft, acting as technical lead on large self service implementations including Employee Self Service, Manager Self Service, eRecruit, and ePerformance.

Highlights

- Evangelized and led Agile PeopleSoft Development Team with great success
- Led and participated in development of large PeopleSoft self service implementations
- Received consistent exemplary performance ratings and was promoted into management tier based on a strong record of successful project delivery

Freelance Work

2006 Freelance PeopleSoft Development ePerformance/eRecruit

Baptist Health Care, Novant Health, Yellow Trucking

2005 Birch Hill Marketing BirchHillMarketing.com

Designed and developed XHTML website for BirchHillMarketing
Installed and configured Radiant CMS

2005 AttorneyLesBailey.com

Simple Brochure site I designed and developed
